PROFESSIONAL SUMMARY

AI product engineer shipping full-stack, mobile, and agentic systems from prototype to production. Built an App Store product used by 400+ people and production data workflows spanning millions of records.

SKILLS

Languages: Python, JavaScript, TypeScript, Swift, SQL, Java, C++
AI/ML: LLM applications, RAG, AI agents, embeddings, DistilBERT, LangGraph, Pinecone
Product & Infrastructure: React, Next.js, FastAPI, Django, AWS, Docker, WebSockets, Convex

EXPERIENCE

AI Engineer Nov 2025 - Present
Cognizant

- Designed an AI-assisted synthetic-data testbed for the global data warehouse using column metadata and business rules to reduce manual test-data preparation.
- Fine-tuned DistilBERT, increasing sentiment-analysis accuracy by 25 percentage points.
- Executed ETL regression testing across millions of records to surface pre-production data defects.

Software Engineering Intern Jul 2023 - Sep 2023
The Difference

- Built a web version of a fitness app from Figma designs using WordPress, HTML, and CSS.
- Evaluated web technologies for the company's app-to-web migration and delivered two dynamic front-end applications.

SELECTED PRODUCTS & PROJECTS

SelahNote | Founder Jun 2025 - Present

- Shipped SelahNote to the App Store in two months, growing the product to 400+ users.
- Built a real-time WebSocket pipeline for streaming audio transcription and live agent-driven responses.
- Implemented Pinecone vector search and secure multi-device synchronization with Convex.

AI Teleprompter Mar 2026

- Built an AI teleprompter using WebSockets, OpenAI embeddings, and lookahead alignment for skips and ad-libs.
- Placed in the top 5% of applicants by shipping a stable WebSocket-based AI teleprompter in a four-hour engineering challenge.

V1 ProdBot Sep 2026

- Built an AI-powered documentation and troubleshooting assistant for companywide AV workflows using React, TypeScript, Convex, and the OpenAI Responses API.
- Automated system documentation creation and maintenance through version-controlled generation and approval.

MunchMap | 1st Place, Headstarter Hackathon Feb 2024

- Won first place at the Headstarter Hackathon by building a role-based React food-donation workflow with a three-person team and demonstrating it live to 200+ attendees.

EDUCATION

Bachelor of Science in Computer Science Jun 2024
City University of New York (CUNY), Hunter College
